

Mirroring For JVC

Quick Start Guide

Follow the steps below to start wired USB mirroring for iPhone®
Works with the following JVC Receivers: KW-V960BW and KW-M865BW

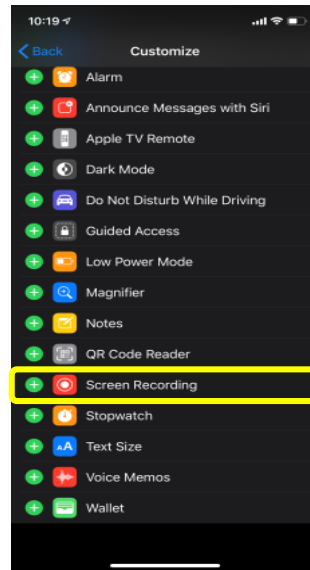

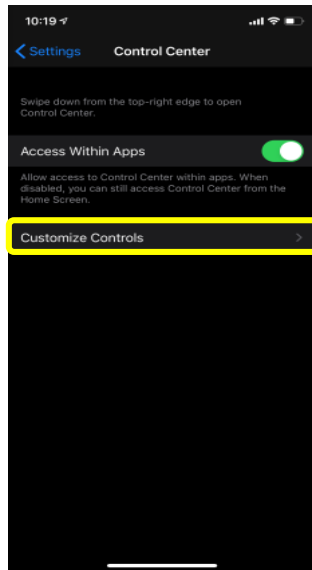

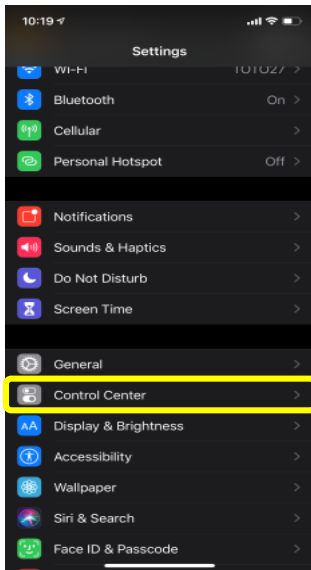

Download the Mirroring for JVC Application

This is available in the App Store

For more information visit:

https://www.jvc.net/car/app/mirroring_for_jvc/

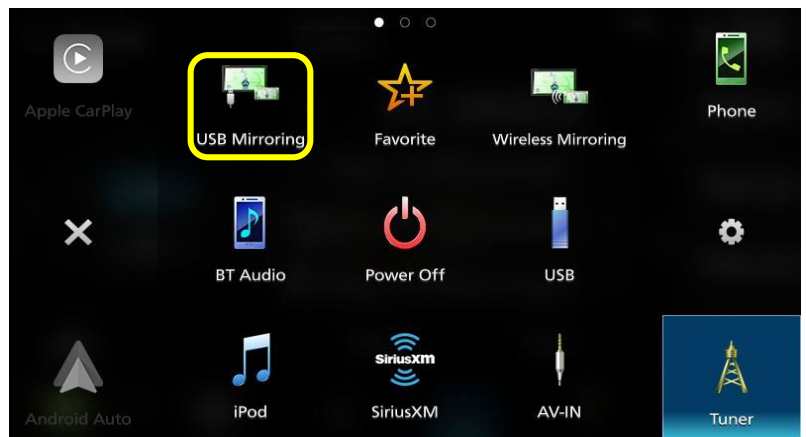

Enable Screen Recording

From the iPhone, go to Settings, Control Center, Customize Center, then select the green “+” icon next to Screen Recording.

Open USB Mirroring Source

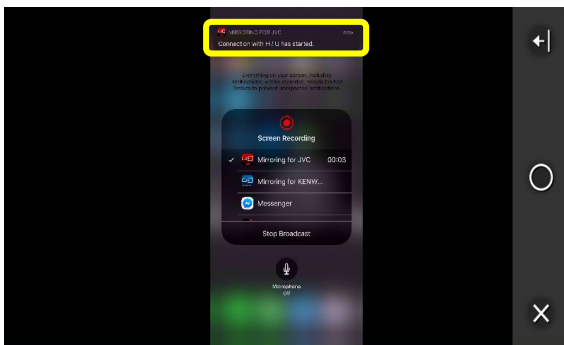

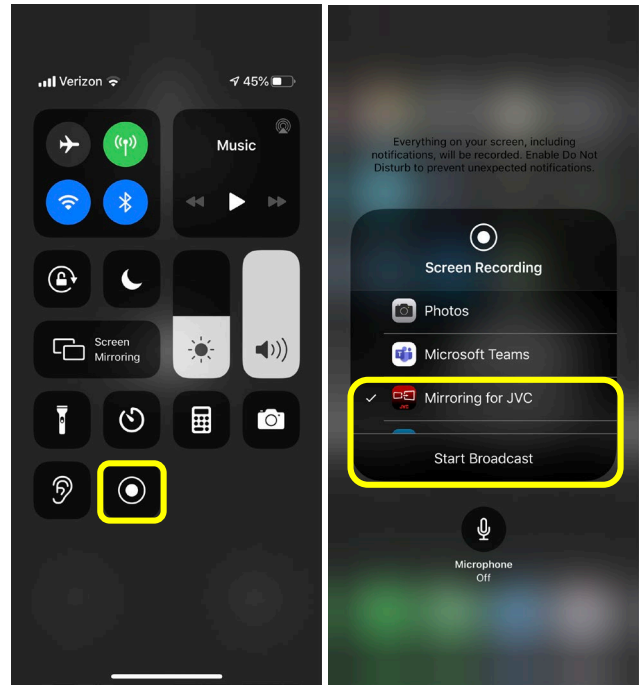

On the receiver, navigate to the icon that's indicated on the screenshot to the right.

Make sure your lightning cable is connected to the BLACK USB Input.

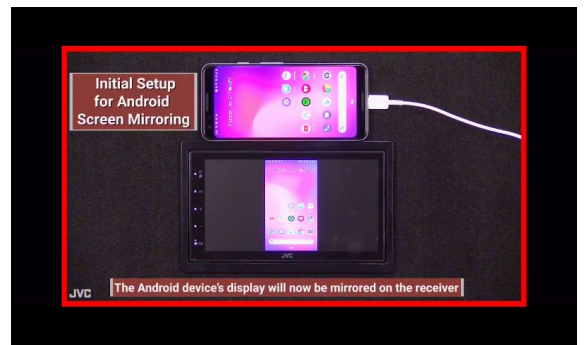

Activate Screen Broadcast

Locate the screen record button pictured to the right (different methods depending on the iPhone model) and long press it. Then select “Mirroring for JVC”, then select “Start Broadcast”.

The message at the top of the screen indicates that the connection is complete. Although touch control is only available from the iPhone, the receiver provides 3 virtual hard keys, primarily for quick access to the iPhone’s Home screen.

You can now view images and videos in both vertical and horizontal views!

Known limitations – Hulu®, Netflix®, & Amazon Video® do not pass video. / YouTube® and Vimeo® currently pass video.

IMPORTANT: The receiver will prompt you, but it’s important to note that the phone **MUST** be connected through BT for audio to function with this feature. **Parking Brake MUST be engaged for video support.**
